

CARRIER OBJECTIVES

Full-Stack Developer with 6 months of professional experience building and maintaining web applications using the MERN stack. Strong in JavaScript, React.js, Node.js, and MongoDB, with hands-on experience in integrating REST APIs, managing application state, and developing scalable backend services. Experienced with GSAP and Three.js for interactive UI, and AWS for basic cloud deployment and services. Seeking a full-stack role in a either product-based or service-based organization to contribute to stable, maintainable, and performance-driven applications.

EDUCATION

Sona College of Technology, Salem

Bachelor Degree in Electronics and Communication Engineering
2021-2025

Gover.Hr.Sec.School, A.S.Palayam

HSC in state board of Tamilnadu with 82%.
2020-2021

Gover.Hr.Sec.School, A.S.Palayam

SSLC in state board of Tamilnadu with 78%.
2018-2019

SKILLS

JavaScript (ES6+), HTML5, CSS3, Python, C (Programming in C), React.js, Next.js, Redux Toolkit, Tailwind CSS, GSAP, Three.js, Lottie Animation, Responsive Web Design, React Hooks, Context API, Dynamic Form Handling, Code Splitting & Lazy Loading, Reusable Component Architecture, Props Drilling & State Lifting, Performance Optimization, Node.js, Express.js, RESTful API Development, JWT Authentication, Server-side Validation, MVC Architecture, Redis, MongoDB, CRUD Operations, Schema Design, Axios/Fetch, Error Handling, Memoization, React Performance Profiling, Bundle Optimization, Indexing, jest

Also in:

IoT System Design, PCB design, Embedded System Architecture, Blender 3D animation, Poster Design, Video editing, event management, ms office, Zoho CRM

TOOLS

Git, GitHub, Postman, VS Code, Netlify, Render, AWS, Google Analytics, Davinci Resolve, Blender, Canva, adobe illustrator and premier, MS office, KiCad

CERTIFICATIONS

- Machine Learning with Python Offered by IBM
- Full Stack by Anna University
- Vision Bot by Texas Instrumentation
- Google IT Support Professional Certificate
- Zoho Customer management system

LANGUAGES

- English
- Tamil
- Kannada

ACHIEVEMENTS

- **Best Project Award (2025)** - Awarded by the college for developing a Real-Time Assistive System for Visually Impaired using radar-based obstacle detection and intelligent feedback mechanisms.
- **Employee of the Month(Dec 2025)** - Recognized for exceptional performance, commitment, and consistent contribution.
- Qualified for JEE Advanced after securing **69 percentile in JEE Main**
- **Pongal Festival Event Lead (5 Years)** - Managed planning, team coordination, budgeting, vendor communication, and on-ground execution of large-scale cultural events.

SOFT SKILLS

- Leadership & Team Coordination
- Analytical Thinking
- Time Management
- Communication Skills
- Adaptability

HOBBIES

- Animation
- Editing
- Making Designs
- Photography

EXPERIENCE

MERN Stack Developer | Gessdemn Global Services, Coimbatore

July 2025 – February 2026

Started as a Frontend Developer and transitioned into a MERN Stack Developer within two months through continuous learning and hands-on development. Contributed to 25+ projects including static websites, dynamic web applications, e-commerce platforms, and internal software systems. Demonstrated strong ownership and independently solved complex technical challenges while delivering scalable solutions.

FULL-STACK APPLICATIONS

Enterprise Admin Management System (Internal ERP)

Product Architect | Frontend Engineer | System Designer

Designed and developed a centralized Admin Management System to manage employees, interns, recruitment processes, payroll, attendance, expenses, clients, and project tracking within a unified platform.

- Architected and built a centralized administrative platform to streamline HR, recruitment, payroll, attendance, expense tracking, and project management workflows.
- Developed a modular frontend architecture using React.js and Redux Toolkit to handle scalable state management across complex business operations.
- Implemented dynamic form systems for capturing structured HR and recruitment data with flexible validation and configurable data flows.
- Simulated backend infrastructure using JSON Server, modeling relational-like data structures and implementing full CRUD operations.
- Engineered role-based workflow logic supporting HR, administrative, and management-level access and operations.
- Developed mini-CRM functionality to manage clients, project allocations, budgets, and expense tracking.
- Applied performance optimization techniques including memoization, lazy loading, and code splitting to improve rendering efficiency and maintainability.
- Designed scalable schema-like data structures anticipating future migration to a full backend using Node.js and MongoDB.

Prabha Tex – MERN Stack E-Commerce Platform

System Architect | Full Stack Developer | Backend Engineer

Developed and deployed a production-grade MERN e-commerce platform with secure Razorpay payments, Cloudinary media management, scalable MongoDB architecture, and a full admin operations dashboard.

- Architected and deployed a production-ready MERN stack e-commerce platform for a traditional saree brand serving real customers.
- Integrated Razorpay payment gateway with secure server-side signature verification and transaction validation.
- Implemented Cloudinary-based media management with CDN-optimized image delivery for efficient asset handling.
- Designed scalable MongoDB schemas for products, users, orders, coupons, and inventory management.
- Developed core e-commerce features including product search, category filtering, wishlist, coupon/discount logic, and stock management.
- Built complete order lifecycle management, including order placement, status tracking, and invoice generation.
- Created a secure Admin Dashboard for product control, order monitoring, and operational management.
- Implemented JWT authentication, bcrypt password hashing, and role-based access control for application security.
- Developed and structured RESTful APIs using Node.js and Express.js for scalable backend services.
- Deployed and maintained the live production environment, successfully handling real payment transactions and order processing.

Vidiyal – Interactive Web Experience Platform

System Architect | Frontend Engineer | Backend Developer

- Architected and developed a highly interactive React.js web platform focused on smooth user experience and high visual performance.
- Implemented advanced motion design using GSAP, including custom timelines, scroll-triggered animations, and seamless page transitions.
- Integrated Three.js to create immersive 3D visual elements enhancing modern UI interactions.
- Utilized Lottie animations for lightweight, scalable vector-based motion graphics.
- Optimized application performance using React.lazy, Suspense, and code splitting for efficient component loading.
- Improved rendering efficiency using useMemo and Context API to reduce unnecessary re-renders.
- Designed and built a dynamic Admin Dashboard to manage content, media, and configuration.
- Implemented secure media upload handling using Multer for image and video asset management.
- Developed responsive layouts ensuring consistent animation performance across devices.
- Engineered asset preloading strategies to handle high-resolution media while maintaining smooth frame-rate performance.
